DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by both Ruetz (EP 0517241 A2) and Ogletree.

Both Ruetz's Fig. 3 and Ogletree's Fig. 3B show a circuit for calculating a second data set based on a first data set calculated by a calculation device (e.g. Ruetz's adder 368 and Ogletree's adder 354) and transport means for routing the first data set from the output to the input of the calculation device (e.g. Ruetz's elements 356-380 excluding 368 and Ogletree's elements 358, 360-363 and 380). Relative to claim 2, Ruetz regulates the number of clock cycles in accordance with the number of rows in the square matrix and Ogletree regulates the number of clock cycles by means of the internal control unit, 380.

Drawings
